Insights from Sales Overview

Watch:

Revenue growth plateaued after a November 2017 peak

What happened: Monthly revenue increased from 120M in Jan 2017 to 1.01B in Nov 2017, then stabilized around 850M-1B through Aug 2018.

Recommended: Cross-reference marketing/promo calendars for Nov 2017 to confirm whether the peak was a one-off event.

Critical:

Customer retention is critically low across the market

What happened: Only 3.17% of customers ever place a second order the overwhelming majority buy once and never return.

Recommended: Prioritize retention through post-purchase emails and loyalty incentives, as new customer acquisition isn't sustainable with such a low repeat rate.
